

Statement of I.R. Iran on:

**Investment Case 2025–2028
Thursday 17 Oct 2024 – 11:30 – 12:30
Session 3 – WHA/ EB –
programme and BUD matters
WHO Investment Round**

- We fully agree with the WHO Strategic Direction on Investment case 2025-2028, however Iran's contribution to WHO needs to be discussed more with the New Government.
- We assure that Islamic Republic of Iran will contribute in different ways and means to the GPW14 in the near future.
- However, keeping in mind imposed Sanction to I.R of Iran and challenges in Bank Transfer on one side, and importance of operationalizing RD's Flagships, we came out with an innovative approach that is a linkage between RD's flagship 1 "expanding equitable access to medical products" with the GPW14.
- In this regard, I am proud to announce that Islamic Republic of Iran has supported medical supply to the victims of Gaza and Lebanon, and will continue this humanitarian medical support to the countries in need of health goods, particularly highly effective medicines and vaccines, which are produced locally with fundamentally comparative prices.

Madam/Mr. chairperson, thank you for this opportunity and many thanks for your attention.
