

Table 2 Common physical findings in thyroid related immunological orbitopathy in 68 patients with Graves disease

Finding	%
IOP rise	88.2
Lid retraction	64.2
Periorbital swelling	50.0
Staring	48.6
Injection over horizontal recti insertion	48.5
Exophthalmos	53.0
Lagophthalmos	28.1
Punctate corneal epithelial erosion	25.0
Peripapillary venous tortuosity	20.9
Diffuse injection	20.9
Dry eye	20.6
Restricted eye movements	19.1
High IOP, upgaze	19.1
Eye deviation	13.3
Significant IOP rise	13.2
Caruncle swelling	7.4
High IOP, primary position	4.4
Decreased levator function	4.4
Chemosis	4.4
Disc swelling	1.5
Corneal ulcer	1.5
Corneal opacity	1.5
Relative afferent pupillary defect	0.0

IOP = intraocular pressure.
