

Table 5 Comparison of practices of lecture and videotape groups to reduce exposure of their children to pesticides at the farm, pre-training, and 2 weeks and 1 month after the training

Practice	Pre-training		2 weeks after		1 month after	
	Lecture (n = 165)	Video (n = 132)	Lecture (n = 165)	Video (n = 132)	Lecture (n = 165)	Video (n = 132)
	%	%	%	%	%	%
Close house windows and doors during application in nearby farm	44.0	42.0	80.0	86.0	76.0	82.0
Never allow children in the field during spraying	38.0	42.0	98.0	98.0	95.0	96.0
Never allow household utensils to be used in diluting, mixing or application of pesticides	66.0	77.0	100.0	100.0	100.0	100.0
Father's contaminated clothes kept away from house	34.0	41.0	91.0	95.0	88.0	95.0
Father showers after use of pesticides in the farm	57.0	51.0	71.0	72.0	74.0	71.0
Dispose of empty containers in a safe place	74.0	77.0	89.0	91.0	91.0	92.0

n = total number of participants.
