

Table 3 Knowledge of cutaneous leishmaniasis prevention measures by rank of mentioning for the complete sample, males and persons with ≤ 6 years of education

Variable	Prevention measure (no. of responses)			
	Rank			
	1	2	3	4
Complete sample	Bednets (17)	Insecticides (14)	Personal hygiene (9)	Waste disposal (5) ^a
Males	Personal hygiene (3)	Window mesh (3)	Sterilize water (2)	Waste disposal (2)
≤ 6 years education	Insecticides (10)	Bednets (9)	Personal hygiene (6)	Waste disposal (3)

^aThere were 2 responses for waste disposal from persons with > 6 years of education. This group also gave 2 responses for each of window mesh and wash fruits. The responses of females and those with > 6 years of education had the same order as in the complete sample.
