

Table 5 Multiple logistic regression analysis of the risk factors for a high score on the Edinburgh Postnatal Depression Scale (≥ 12)

Risk factor	OR (95% CI)	P-value
Husband not perceived as supportive	2.41 (1.24-4.69)	0.01
History of depressive symptoms	8.13 (3.77-17.5)	< 0.001

OR = odds ratio; CI = confidence interval.
