

M N P 1 2 3 4 5 6 7 8 9 10 11 12 13

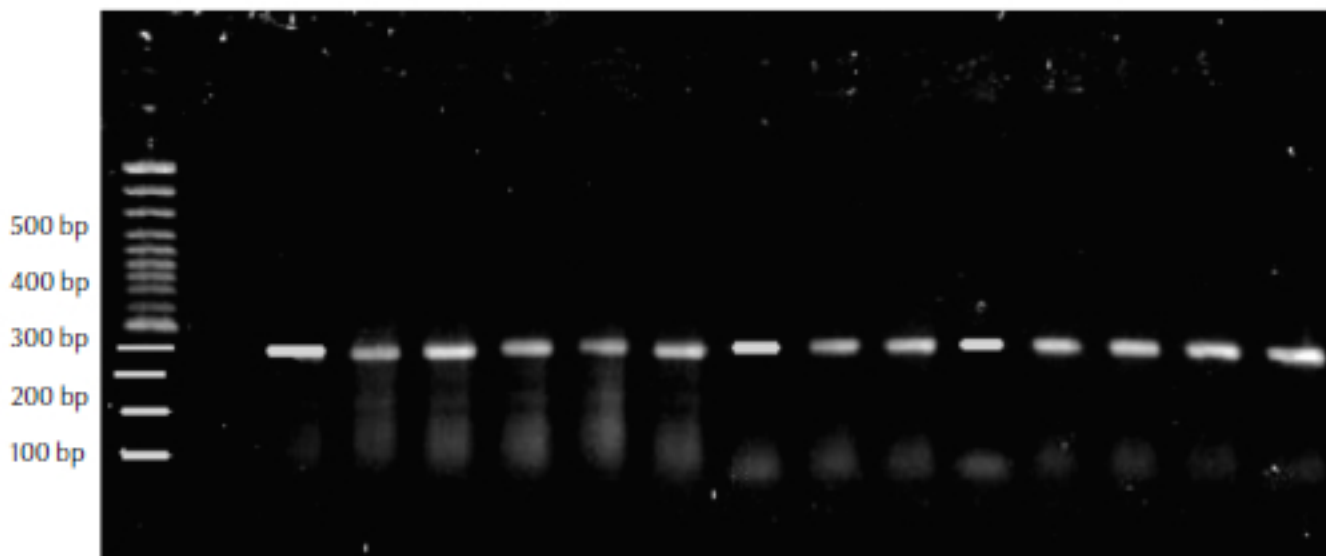

Figure 1 Polymerase chain reaction assay results using the MF and MR primers for detection and amplification of the *Mycobacterium rpoB* gene from the Isolates with leader marker (100 bp) to detect the size of amplified DNA
M = molecular weight control marker (100 bp); *P* = positive control; *N* = negative control; lanes 1–13 from patient samples
