

Table 4 Geometric mean antibody titres against poliovirus serotypes in fully vaccinated children aged 18–22 months, by urban and rural regions of both districts combined: January 2010, Sistan-va-Baluchestan Province, Islamic Republic of Iran

Virus type/area	No. of children	Geometric mean titre	<i>P</i> -value (independent <i>t</i> -test)	Mean rank	<i>P</i> -value (Mann-Whitney test)
<i>PV1</i>					
Urban	142	117	0.148	162	0.075
Rural	162	88		144	
<i>PV2</i>					
Urban	142	120	0.823	152	0.937
Rural	162	125		152	
<i>PV3</i>					
Urban	142	43	0.023	164	0.027
Rural	162	26		142	

PV1 = poliovirus serotype 1; *PV2* = poliovirus serotype 2; *PV3* = poliovirus serotype 3.
