

Table 2 Discriminant validity: correlation between decayed/missing/filled teeth (DMFT) scores and overall and subscale scores on the short version of the child oral health-related quality of life questionnaire (CPQ 11-14) ($n = 268$)

Variable	DMFT score	
	Spearman ρ	<i>P</i> -value
<i>Total scale</i>	0.09	0.133
<i>Subscales</i>		
Oral symptoms	0.08	0.210
Functional limitations	0.13	0.036
Emotional well-being	0.01	0.878
Social well-being	0.03	0.611
