Table 4 Correlation of the study participants' characteristics with the domains of social capital in the Social Capital Integrated Questionnaire using Pearson test

Quantitative variables	Mean (SD) value	Min.–max. value	Correlation with social capital domains[a]									
			Groups and networks		Trust and solidarity		Collective action and cooperation		Social cohesion and inclusion		Empowerment and political action	
			r	*P*-value	*r*	*P*-value	*r*	*P*-value	*r*	*P*-value	*r*	*P*-value
Age (years)	38.5 (8.4)	10–60	0.02	0.737	0.25	0.120	0.19	0.002	0.11	0.188	–0.06	0.518
Level of education (years)	9.1 (3.6)	0–23	0.12	0.037	0.22	0.179	0.03	0.675	0.08	0.382	0.02	0.824
Economic status[b]	29.6 (25.7)	4–300	0.02	0.737	0.05	0.745	–0.13	0.05	0.00	0.988	–0.01	0.327
Disease awareness period (years)	4.6 (4.2)	< 1–26	0.12	0.033	–0.02	0.895	0.07	0.301	0.19	0.026	0.03	0.764

[a]Pearson correction coefficients (r); [b]Total living area of home divided by household size SD = standard deviation.
