*<sup>a</sup>Results of univariate and age-adjusted logistic regression models, using positive anti-HCV EIA results as the dependant variable.*

*<sup>b</sup>Includes residents and senior doctors; <sup>c</sup>Includes both nurses-in-training, and qualified/practising nurses; <sup>d</sup>Includes Cardiology, Pulmonary disease, Geriatrics, Tropical medicine and Nephrology; <sup>e</sup>Among males only (n = 467); <sup>f</sup>Among males who shave their beards (n = 409); <sup>g</sup>Among males who shave their beards at the barber's shop (n = 328).*

*OR – odds ratio; CI – confidence interval; ICU – intensive care unit.*
