Table 2 Experts' opinion of the scope, essential and main parts, essential models, and ontology of EHR messaging standards

General feature		Percentage
Scope of standard	For all health domains	56.5
Essential and main parts	Reference models	76.2
	Archetype	53.0
Essential models	Information model	71.4
	Use case model	52.4
	Interaction model	81.0
Ontology	Use of current terminologies like SNOMED and LOINC	85.7

EHR – electron health record; LOINC – Logical Observation Identifiers; SNOMED – Systematized Nomenclature of Medicine.
