

Table 3 Logistic regression analysis of factors predicting normal developmental milestone at the end line assessment

predictors	Communication	Growth motor	Fine motor	Problem solving	Personal-social
	OR (95% CI)	OR (95% CI)	OR (95% CI)	OR (95% CI)	OR (95% CI)
Groups (ref: intervention)	3.42 (2.02–7.66)**	3.15 (1.51–6.59)*	4.23 (2.39–8.46)**	4.21 (2.66–8.48)**	4.59 (2.79–8.54)**
Maternal social support (ref: support)	3.30 (1.56–5.98)*	1.58 (0.7–3.56)	2.25 (1.09–4.6)	1.36 (0.65–2.88)	2.1 (0.96–4.5)*

Logistic regression models

OR=odds ratios; 95% CI=95% confidence intervals.

Other variables included in the model are: mother's age, mother's education, residence, family type (nuclear or extended), parity and sex of child.

*P<0.01 **P<0.001
