

Table 5 Stepwise multiple logistic regression for tendency towards violence among adolescents

Independent variable	Odds ratios	95% confidence interval	Standard error	t ratio	P
Attitudes towards women score	1.40	1.30-1.54	0.41	2.86	< 0.001
Sex	4.95	2.12-11.59	0.41	2.86	< 0.001
Violence attempts received from family members, relatives, or friends	4.17	2.46-7.10	0.24	16.39	< 0.001
Observed violence attempts towards family members, relatives, or friends	8.33	5.37-13.07	0.22	4.23	< 0.001
Intercept	1.44×10^{35}	$1.65 \times 10^{12} - 1.19 \times 10^{44}$	1.02	30.01	< 0.001

$R^2 = 0.14$

$P < 0.001$

$n = 2321$
