

**Table 5 Association of sociodemographic variables with suicidal attempt, multiple logistic regression among currently married women (n = 2243)**

Independent variables	Suicidal attempt		
	B	OR (95% CI)	P value
<b>Age groups, years</b>			
15-24	1.12	3.07 (2.10-4.49)	<0.001
25-34		1.0	
>35	0.30	0.74 (0.48-1.16)	0.192
<b>Level of education</b>			
> High school		1.00	
≤ High school	0.16	1.17 (0.82-1.67)	0.399
<b>Exposure to domestic violence during childhood</b>			
No		1.0	
Yes	1.32	3.72 (2.52-5.50)	<0.001
<b>Recent exposure to domestic violence</b>			
No		1.0	
Yes	1.61	5.0 (3.40-7.35)	<0.001
<b>Having psychological health problems<sup>a</sup></b>			
No		1.00	
Yes	1.66	5.27 (3.28-8.45)	<0.001

<sup>a</sup>Including stress, anxiety, and depression. OR = odds ratio; CI = confidence interval.
