

Table 2 Effect of travel on risk of acute respiratory tract infection among hajjis from Riyadh

	No. of hajjis (n = 1027)	No. of cases (n = 409)	Cumulative incidence %	Risk ratio	95% CI
<i>Mode of travel</i>					
Airplane	513	181	35.3	1	—
Bus	468	206	44.0	1.25	1.07–1.46
Car	46	22	47.8	1.36	0.98–1.87
<i>Duration of stay in hajj area (days)^a</i>					
4–5	483	169	35.0	1	
6	411	168	40.9	1.17	0.99–1.38
7	115	61	53.0	1.52	1.23–1.87
8+	18	11	61.1	1.75	1.18–2.57

^aChi-squared test for linear trend = 15.078, P < 0.001.

n = total number of cases.
