

COP 22 Health Related Events - WHO

8 November

Time	Title/Theme	Organizer	Venue
15:00-16:30	<p>Human water security, public health and climate change: Integrating the Sustainable Development Goals and the UNFCCC to drive action and build resilience</p> <p>This session is designed to help ensure human water security and public health are central to ongoing climate change discussions – particularly as key decisions regarding implementation of the Paris Agreement are being made. The session will facilitate a high-level dialogue on emerging water and climate challenges, as well as known technical and policy responses that can effectively address these challenges. New and necessary connections between climate change, health and water practitioners will be forged.</p> <p>The session also aims to garner support for a new alliance under the Global Climate Action Agenda (GCAA) focusing on human water security, public health and climate change. The alliance will be considered by a number of key UN agencies, multilateral development banks, non-government organisations, as well as actively discussed with the audience.</p>	UNICEF, World Bank Group, World Health Organization (WHO), UK Department for International Development (DFID), AGWA	Green Zone
11:30-13:00	Gender and Climate Justice (by TERRE Policy Centre)		Pacific (150)

9 November

Time	Title/Theme	Organizer	Venue
13:00-14:30	<p>Climate Change, Human Migration and Health</p> <p>This conference will bring together scientists and experts to share, better understand, and propose through a transdisciplinary approach some tangible solution to enhance the health context of climate migrants. It will discuss possible indicators of migration, health and</p>	USPC (Centre Virchow-Villermé for Public Health Paris-Berlin, Politiques de la terre), Charité – Universitätsmedizin e Berlin, Université de Genève, Académie des	Green Zone, Room 1

	climate change, to be included in the Lancet Countdown on Health and Climate Change.	Sciences Hassan II Sciences (tbc), Université Internationale de Rabat, Université de Liège (Observatoire Hugo), the Lancet Countdown on Health and Climate Change	
	<p>10th Focal Point Forum of the Nairobi Work Programme: Health and Adaptation</p> <p>This side event will focus on the global landscape of climate change impacts on human health, as well as the status of adaptation to health impacts in general.
