Population Health & Facility Management

PERFORMANCE

Access Index⁵

ENPSF, 2018

Quality Index⁵

Service Coverage Index

ENPS (2018), Ministry of Health, Implementing the HIV / AIDS Policy Statement, National Report (2019), STEP survey (2018)

EQUITY

Access: % with perceived barriers due to cost, by wealth quintile

Coverage of RMNCH⁶ services, by mother's education

ENPS (2018)

Outcomes: Under-five mortality⁷, by residence

ENPS (2018)

COUNTRY CONTEXT AT-A-GLANCE

GDP per capita

(PPP int'l dollars)
WDI (2019)

\$7,826

Living in poverty⁸

(Under \$1.90 int'l dollars / day)
WDI (2013)

1%

Government health spending as % of GDP⁹

WHO GHED (2017)

2%

Life expectancy at birth

(Years) WHO (2016)

76

Maternal mortality

(Per 100,000 live births)
WHO est. (2017)

70

Neonatal mortality

(Per 1,000 live births)
WHO est. (2018)

14

Premature NCD mortality¹⁰

(Probability)
WHO est. (2016)

12%

Causes of death

WHO est. (2016)

Note: Indicator values presented here may differ from country data sources due to the use of standardized categories and methods to enhance international comparability. See Indicator Description Sheet for details.

Note: Scores for the Capacity, Performance, and Equity domains are color-coded to reflect good (green), medium (yellow), and poor (red) performance, where comparable data are available. Cut-offs can be found in the Indicator Description Sheet. Scores based on data from non-comparable sources are colored gray. Finance indicators are not color-coded because these indicators lack common targets.

1. Current PHC expenditure as % of Current Health Expenditure (CHE)
2. Domestic general government PHC expenditure as % of domestic general government health expenditure
3. Domestic general government PHC expenditure as % of current PHC expenditure
4. The PHC Progression Model uses mixed methods to assess foundational capacities of PHC on a scale from 1 (low) to 4 (high)
5. Because different data/indicators are used in each country, composite index values may not be comparable across countries. See page 2 for the specific indicators used in this VSP.
6. The composite coverage index is a weighted score reflecting coverage of eight RMNCH interventions along the continuum of care (http://www.who.int/gho/health_equity/report_2015/en/)

7. Deaths of children before age 5, per 1,000 live births
8. Living in poverty: 2.23; HCP; ENCDM 2013/2014
9. Domestic general government health expenditure as % of gross domestic product (GDP)
10. Probability of dying between ages 30 and 70 from cardiovascular disease, cancer, diabetes, or chronic respiratory disease
11. Communicable, maternal, perinatal, and nutritional conditions
Last updated 7/2020

 World Health Organization <small>REGIONAL OFFICE FOR THE Eastern Mediterranean</small>		SCORE	PERCENTAGE	SOURCE	YEAR
Morocco					
ACCESS					
Financial					
Perceived access barriers due to treatment costs*		63%		ENPSF	2018
Geographic					
Perceived access barriers due to distance*		37%		ENPSF	2018
QUALITY					
Comprehensiveness					
No recent indicator available from international or national data sources					
Continuity					
DTP3 dropout rate*		3%		ENPSF	2018
Treatment success rate for new TB cases		87%		Regional core indicators booklet	2019
Person-Centeredness					
No recent indicator available from international or national data sources					
Provider availability					
No recent indicator available from international or national data sources					
Safety					
No recent indicator available from international or national data sources					
SERVICE COVERAGE		60			
Reproductive, Maternal, Newborn and Child Health					
Demand for family planning satisfied with modern methods		80%		ENPS	2018
Antenatal care coverage (4+ visits)		61%		ENPS	2018
Coverage of DTP3 immunization		94%		ENPS	2018
Care-seeking for suspected child pneumonia		70%		ENPS	2018
Infectious diseases					
Tuberculosis cases detected and treated with success		76%		Regional core indicators booklet	2019
People living with HIV receiving anti-retroviral treatment		64%		MOH, Implementing the HIV/AIDS Policy Statement, National Report	2019
Children under 5 with diarrhea receiving ORS		33%		ENPS	2018
Non-Communicable Diseases (NCDs)					
% of population with normal blood pressure***		29%		STEP Survey	2018

*Indicators where lower values are preferable were transformed before inclusion in the index. The modified indicator was defined as 100-X, where X is the original percentage shown in this table.
 Country-specific (proxy) indicator, used in absence of globally comparable survey data. *Percentage of adult population with normal blood pressure is based on age-standardized estimates. These distributions are rescaled to provide finer resolution before inclusion in the index. Rescaled indicator = $(X-50) / (100-50) * 100$, where X is the prevalence of normal blood pressure. For more details see Tracking UHC: 2017 Global Monitoring Report. Note: Summary scores for the domains of Access, Quality, and Coverage are calculated by taking the average of indicator values within each subdomain, and then taking the average across subdomain scores.
