Benefits of tobacco control

Conclusion

The WHO Framework Convention on Tobacco Control: The political solution

Globalization and international law

The WHO FCTC and the globalization of the tobacco epidemic

The WHO FCTC process and the lessons learned

Post-adoption phase of the WHO FCTC process

Conclusion

**World Health
Organization**

Regional Office for the Eastern Mediterranean

PART II: PUTTING THEORY INTO PRACTICE

Developing a national plan of action

Finding the architects of the plan: Establishing a national coordinating mechanism

Determining needs and resources: Conducting a situation analysis

Setting the strategic direction

Developing the blueprint for action: Drafting the national plan

Ensuring legitimacy: Official adoption of the national plan of action

Launching the national plan of action

Considerations

Critical issues to consider when developing a plan of action

Establishing an effective infrastructure for national tobacco control programmes

Overview

National coordination of the NTCP

Training and education

Introduction

Know the country: Links between needs assessment and decisions on training and education

Annex 1: Workshops

**World Health
Organization**

Regional Office for the Eastern Mediterranean

Communication and public awareness to build critical mass

Introduction

The first step: Plan and strategize

The second step: Select channels and materials

The third step: Develop and pretest the messages and materials

The fourth step: Implement the programme efficiently

The fifth step: Assess effectiveness

Measuring change

Finally, plan for continuity

Campaigning for tobacco control

Working with the media

Using media innovatively

Creating materials for the media

Finally, the media as a stakeholder in tobacco control

Annex 1: Media release

Annex 2: Letter to the editor

Programming selected tobacco control activities

Introduction

Prevention

**World Health
Organization**

Regional Office for the Eastern Mediterranean

Cessation

Protection

High-risk populations

Community mobilization

Legislative and regulatory measures

The WHO introductory guide to tobacco control legislation

Legislative measures on tobacco control

Influencing legislators

Tools and strategies to implement and enforce legislation

Harnessing international legislative experience

Conclusion

Exploring economic measures and funding initiatives

Introduction

Evidence on tobacco price and consumption

Using economic measures to control tobacco use

Funding initiatives for tobacco control

Conclusion

Countering the tobacco industry

Introduction

**World Health
Organization**

Regional Office for the Eastern Mediterranean

The first step towards countering the industry: Know it well

Other approaches to countering the tobacco industry

The WHO FCTC: International help for nations to counter the tobacco industry

Summary

Annex 1: Accessing and searching internal tobacco industry documents

Forming effective partnerships

Role of NGOs

What NGOs can do

The structure of the tobacco control movement

Monitoring, surveillance, evaluation and reporting

Introduction and definitions

Surveillance

Monitoring

Surveillance and evaluation management

Annex 1: STEPS instrument for NCD risk factors

Annex 2: Question-by-question instruction guide for tobacco section

Research and exchange of information

Introduction

From hypothesis to policy

**World Health
Organization**

Regional Office for the Eastern Mediterranean

Research and information exchange for tobacco control and the WHO FCTC

Challenges to effective tobacco control research

Research for advocacy

Understanding the mechanisms for information exchange

Communicating the evidence for tobacco control

Conclusion

**World Health
Organization**

Regional Office for the Eastern Mediterranean
