a Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat (April 2011). World population Prospects: The 2010 Revision, Highlights. New York: United Nations.

b Gross National Income (GNI) per capita is the dollar value of a country's final income in a year divided by its population using Atlas methodology. Data from World Development Indicators database, World Bank, November 2012. <http://data.worldbank.org/indicator/NY.GNP.PCAP.CD/countries>.

c World Development Indicators (WDI) database: Low income is \$1 005 or less, middle income is \$1 006 to \$12 275, high income is \$12 276 or more. Where a precise GNI was not available the WDI estimation of income level was used.

d Adjusted for 30-day definition of a road traffic death.

e Estimated using negative binomial regression (see Explanatory Note 3 on page 48). The estimation of deaths is for 2010, and the confidence interval is given only for countries in Group 4.

f 2010 data not available.

i Non-member area.
