249 Ongoing NSS

Ongoing NSS 2022
IPC Classification

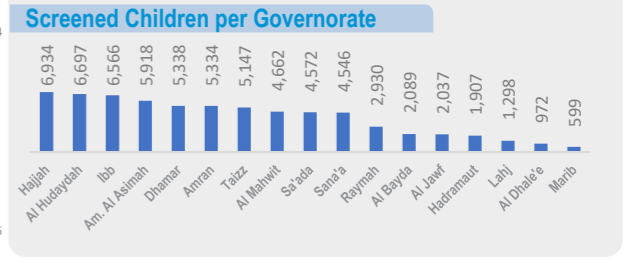

- 37 District in Phase 5 out of 44
- 75 Districts in Phase 4 out of 82
- 73 Districts in Phase 3 out of 98
- 51 Districts in Phase 2 out of 80
- 16 Districts in Phase 1 out of 29

Proportion † of Severe Acute Malnutrition (SAM) Monthly Trend Reporting per Gov

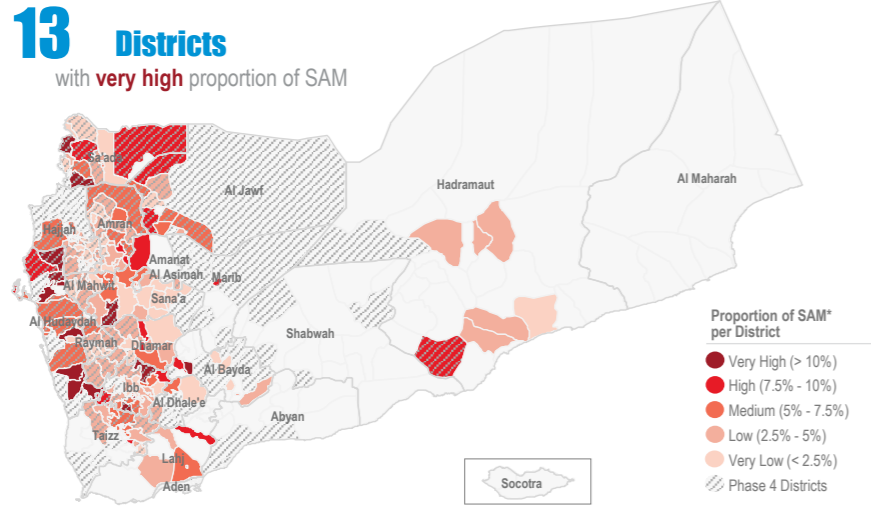

Screened Children Mar

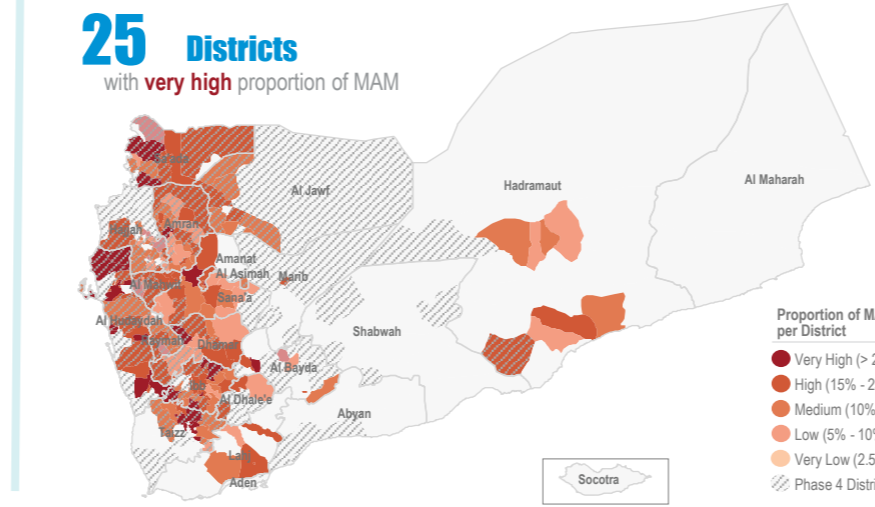

67,546 Screened Children
50% Above 6 Months
50% Under 6 Months

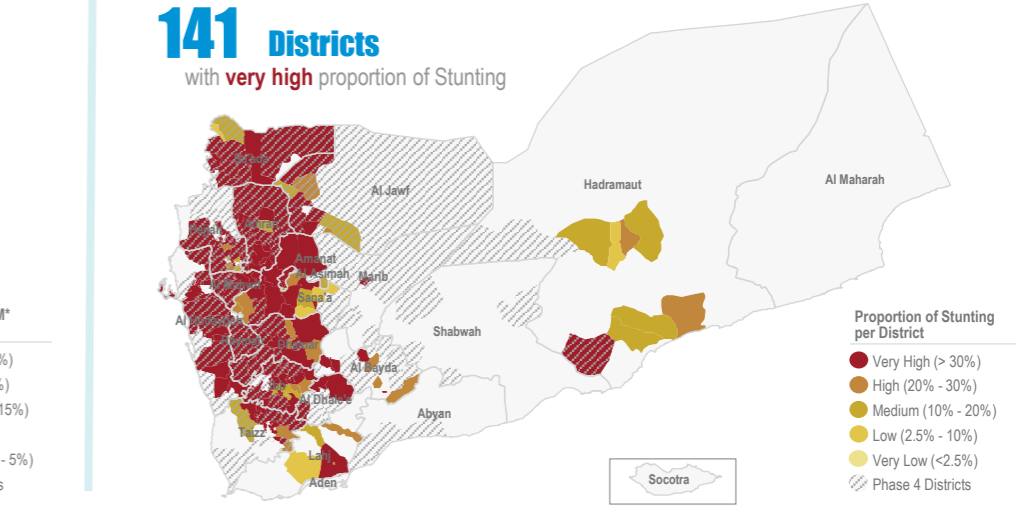

Proportion † of Severe Acute Malnutrition (SAM)* Mar

Proportion † of Moderate Acute Malnutrition (MAM)* Mar

Proportion † of Stunting Mar

Objectives of the Yemen Nutrition Surveillance System

- Monitor children nutritional status, early detection of malnutrition and case referral.
- Share information and trigger alert verification.

Methodology

Nutritional assessment in NSS is normally performed through the measurement of child's weigh, height/length, MUAC, age, hemoglobin level, breastfeeding status and oedema quality.

It is Facility-based surveillance system, established mainly in district hospitals across the country. The system

provides proportion of children under five years found suffering from any forms of malnutrition, out of the total children screened. It is not a formal survey using sampling methods to produce representative results.

The results only reflect the status of children who have attended the health facility in the month under review.

The system tracks Global core nutrition indicators: Stunting, Wasting, Exclusive breastfeeding and Anemia.

This bulletin is based on reports received by the health facility surveillance MoPHP teams*.

WHO supports the MoPHP and constantly works to expand coverage and improve data quality, funded by World Bank.

Summary for Nutrition Indicators Mar 2022 in Reporting Gov

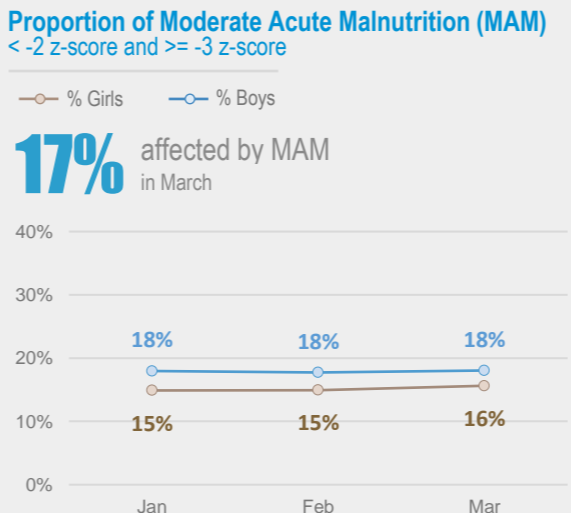

Governorate	# of Screened Children (0 - 5)	# of Screened Children (6 - 59)	Proportion of GAM (0 - 5)	Acute Malnutrition by Z- Score				Acute Malnutrition by MUAC				Underweight		Stunting		Exclusive Breastfeeding		Anemia		Oedema	
				# of MAM	Proportion of MAM	# of SAM	Proportion of SAM	# of MAM	Proportion of MAM	# of SAM	Proportion of SAM	# of Underweight	Proportion of Under weight	# of Stunting	Proportion of Stunting	# of EBF	Proportion of EBF (Yes)	# of Anemia	Proportion of Anemia	# of Oedema	Proportion of Oedema
