

Key Figures - From January to Sep

Service Utilization January-September

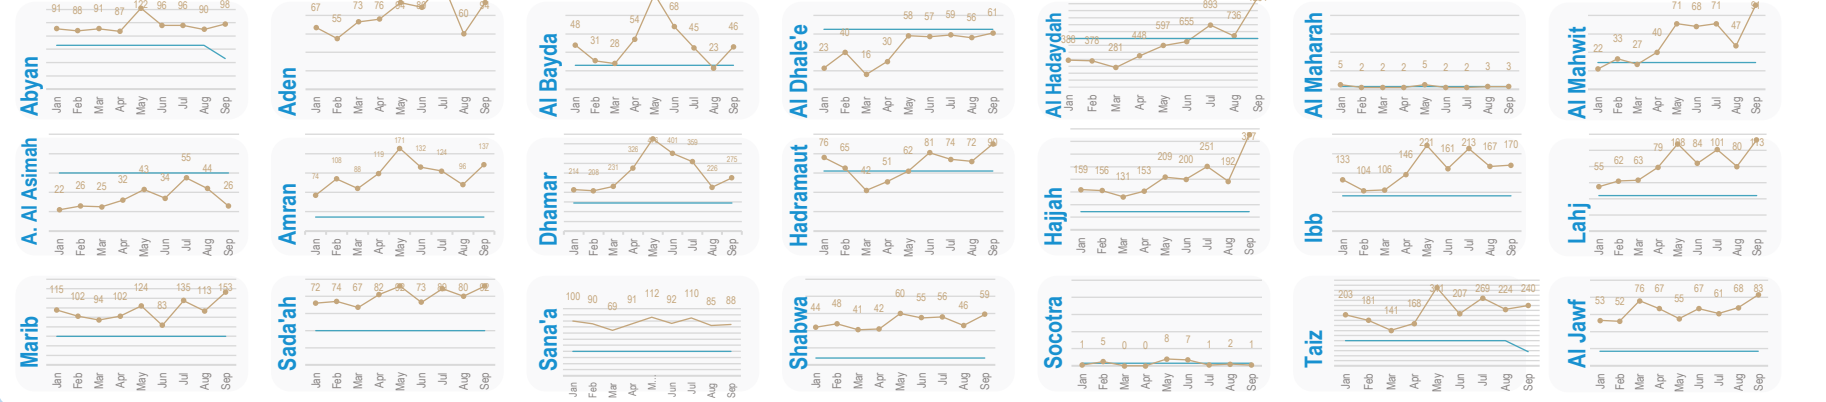

From January to Sep **23,531** children have received life-saving services in WHO-supported TFCs, of which **3,577 (15%)** are children under 6 months.

The quality of service is evidenced by the recovery (**96%**) and death (**1%**) rates. Each caregiver (**23,531**) in total, benefits from at least 5 counselling sessions per hospital stay on IYCF best practices. This might contribute to the observed decrease in relapse rate (**2%**) in Sep

By ensuring the care for most critical cases in pediatric wards in referral hospitals with TFCs, **9,955** children were admitted from Jan to Sep in these referral hospitals for intensive care.
